

Additional Requirement – Project Proposal Submission

Week 14 – Project Proposal Submission

Before the final oral presentation in Week 16, each group must submit a:

Project Proposal

The proposal must be submitted in:

Week 14

This proposal is used for preliminary review of your project direction and progress.

Please make sure your topic is clear, feasible, and follows the course requirements.

Proposal Content Requirements

The proposal should include the following:

1. Group Member Names

Please list all group members clearly.

Example:

- Student A
- Student B
- Student C
- Student D

2. Project Title

Please provide a clear and specific project title.

Example:

- House Price Prediction Using Random Forest
- Student Performance Classification with Decision Tree
- Diabetes Prediction Using Multiple Machine Learning Models

3. Project Motivation

Explain:

- Why did you choose this topic?
 - Why is this problem important?
 - What practical value does it have?
-

4. Proposed Methods

Please describe the machine learning methods you plan to use.

Examples:

- Decision Tree (J48)
- Random Forest
- Logistic Regression
- KNN (IBk)
- Naive Bayes
- SVM
- LogitBoost

You should also briefly explain:

- Why you selected these methods
 - Which models you plan to compare (at least 3 models recommended)
-

5. Dataset Source

Please explain:

- Where the dataset comes from
- Whether the data is self-collected or downloaded
- Expected number of instances and attributes

Examples:

- Kaggle dataset
- WEKA built-in dataset
- Self-collected images
- Web scraping data

6. Expected Results

Please describe what you expect to achieve.

Examples:

- Improve classification accuracy
- Compare which model performs best
- Build a prediction system
- Create visualization results
- Discover important features

Submission Format

The proposal can be submitted as:

- PDF
